TEMPERATURE COMPLIANCE STRATEGIES AND OPTIONS

October 7, 2015	October 8, 2015
9:00 am - noon	9:00 am – noon
Lane Community College Center for Meeting & Learning - Room 226 4000 East 30 th Eugene, OR 97045	Gresham Wastewater Treatment Plant 20015 NE Sandy Blvd. Gresham, OR 97230
	<i>Video and phone access will be provided for this meeting</i>

To protect salmon and other fish, Oregon has a stringent temperature water quality standard. Hot showers and washing dishes and clothes heats wastewater treatment plant effluent, which makes meeting the temperature standard difficult.

Workshop Topics

Attend this workshop to learn more about...

- *Legal issues regarding the temperature standard*
- *How one wastewater utility systematically evaluated compliance options*
- *An inventory of possible compliance strategies including natural treatment systems reuse, tree farms, aquifer storage and recovery, indirect discharge, and water quality trading*
- *Sharing ideas and possible compliance strategies with other ACWA members*

The information presented at each workshop will be the same – attend the workshop that best fits your schedule. A detailed agenda and registration information will be available closer to the workshop.

Additional Information

For more information, contact the ACWA office at 503/236-6722; e-mail at gillaspie@oracwa.org
