

ACWA

July, 2017

Major Components (so far) in Trump Infrastructure Plans

- Air traffic control system privatization
- Reduction in road/highway rules & regulations (for plans & construction)
 - Opposition to existing environmental rules affecting infrastructure
- Increase in toll roads (private infrastructure emphasis) and other facilities
- Large tax breaks for private infrastructure contractors
 - largely paid w/ cuts to current programs, many funded by EPA

But... Specific proposals have not been sent to Congress (NYT front-page story, July 23). It isn't clear if the administration will focus enough on infrastructure to enact new legislation or get budget changes and priorities enacted.
