IN THE CIRCUIT COURT OF THE STATE OF OREGON  
FOR THE COUNTY OF MULTNOMAH

NORTHWEST ENVIRONMENTAL  
ADVOCATES, an Oregon non-profit  
corporation, NORTHWEST  
ENVIRONMENTAL DEFENSE CENTER, an  
Oregon non-profit corporation, and BILL  
BAKKE,

Petitioners,

v.

OREGON DEPARTMENT OF  
ENVIRONMENTAL QUALITY, an agency of  
the State of Oregon, and RICHARD  
WHITMAN, in his official capacity as the  
Director of Oregon Department of  
Environmental Quality,

Respondents.

Case No.

PETITION FOR JUDICIAL REVIEW

(Oregon Administrative Procedures Act,  
ORS 183.490)

Fees: ORS 21.135(2)(a)

**NOT SUBJECT TO MANDATORY  
ARBITRATION**

Petitioners allege as follows:

1.

Petitioners Northwest Environmental Advocates (NWEA), Northwest Environmental  
Defense Center (NEDC), and Bill Bakke seek judicial review of multiple failures to make a

1 decision by Respondents Oregon Department of Environmental Quality (DEQ), and by the  
2 Director of DEQ, currently Richard Whitman, acting in his official capacity. Respondents have  
3 unreasonably delayed making one or more decisions regarding pending National Pollutant  
4 Discharge Elimination System (NPDES) permit renewal applications; each of these permits has  
5 been “administratively continued.”<sup>1</sup>

6 **PARTIES**

7 2.

8 Petitioner NORTHWEST ENVIRONMENTAL ADVOCATES (NWEA) is a non-profit  
9 Oregon corporation with its principal business office located in Multnomah County, Oregon.  
10 NWEA works through advocacy and education to protect and restore water and air quality,  
11 wetlands, and wildlife habitat in the Northwest and beyond. It has been doing so for forty-eight  
12 years.

13 3.

14 Petitioner NORTHWEST ENVIRONMENTAL DEFENSE CENTER (NEDC) is a non-  
15 profit Oregon corporation with its principal business office located in Multnomah County,  
16 Oregon. NEDC works to preserve, protect, and improve the environmental quality of the Pacific  
17 Northwest, and has done so for more than forty-eight years.

18 4.

19 Petitioner BILL BAKKE is a member of NWEA and NEDC and an individual residing in  
20 Multnomah County, Oregon.  
21  
22  
23

24 <sup>1</sup> NPDES permits with pending renewal applications are known as “administratively continued”  
25 permits. These permits should have expired at the end of their statutorily mandated five-year  
fixed term, but remain in effect because DEQ has failed to make a final decision regarding  
whether to deny a permit or to prepare and issue a proposed draft updated permit.

5.

NWEA and NEDC regularly submit public comments on administrative proposals related to water quality and water pollution in Oregon and have brought litigation under the federal Clean Water Act (CWA) over the last three decades to protect and improve water quality in the state.

6.

NWEA and NEDC have brought numerous lawsuits to protect Oregon's water quality and the environment. Some of those suits have focused on trying to assure water temperatures in Oregon streams and lakes are sufficiently protective of threatened and endangered cold-water fish such as salmon, steelhead, and bull trout. NWEA and NEDC have also worked to ensure protection of Oregon's human health and aquatic species from toxic chemicals. NWEA and NEDC additionally regularly provide extensive public comments to Respondent DEQ regarding its proposed water quality standards, proposed CWA 303(d) lists of impaired waters, proposed Total Maximum Daily pollutant Loads (TMDLs) for those waters, and proposed NPDES permits. NWEA and NEDC have also both sought and obtained schedules for the development of TMDLs to help clean up Oregon's impaired waters. Furthermore, NWEA and NEDC have participated in numerous DEQ advisory committees.

7.

Petitioners NWEA and NEDC have invested significant group resources, time, energy, and money to educate the public, monitor and collect information, communicate with state and federal agencies, strengthen clean water regulations, and secure meaningful restrictions on pollutant discharges from municipal and industrial sources in the state.

8.

Petitioners NWEA and NEDC are adversely affected and aggrieved by Respondents' failure to make timely decisions regarding pending NPDES permit renewal applications. Both organizations have invested time and financial resources into improving the water quality standards, listing water quality impaired Oregon waters, and forcing the adoption of TMDLs. These are all protections which Respondents are required to use as the basis for issuing NPDES permits, and which may or should result in more stringent effluent limits being included in any reissued permits, particularly for discharges into impaired waterbodies. Respondents' repeated failures undermine Petitioners' efforts.

9.

Petitioners NWEA and NEDC are also adversely affected and aggrieved by Respondent DEQ's unreasonable delay in making decisions regarding pending NPDES permit renewal applications because this continuing failure forecloses the Petitioners' opportunity and ability to review and submit public comments on those NPDES permits. Additionally, by administratively continuing permits, and then not making any decision on reissuing them, DEQ effectively shields these permits from the more stringent limits that may apply under newer water quality standards, and from being subject to public comment and review, undermining the purpose of the CWA and NWEA's and NEDC's efforts to force implementation of that law.

10.

Petitioners NWEA and NEDC are further adversely affected and aggrieved by Respondents' unreasonable delay in making decisions regarding pending NPDES permit renewal applications because their respective organizational objectives have been undermined by Respondents' unreasonable delay. As organizations incorporated, in part, for the express purpose

1 of protecting water quality, Petitioners NWEA and NEDC have an interest in ensuring that any  
2 permitting decision affecting water quality in Oregon is made in accordance with applicable state  
3 and federal laws. These organizational interests have been injured by Respondents' unreasonable  
4 delay in making decisions regarding pending NPDES permit renewal applications because the  
5 existing expired and administratively continued permits authorize further degradation of  
6 Oregon's waters, both impaired and not impaired. Actual pollution controls that are achieved  
7 through the requirements of NPDES permits are essential to achieving Petitioners' missions.  
8 Continued degradation of water quality may limit the ability of Petitioners NWEA and NEDC to  
9 attract new members, retain current members, and to obtain financial donations. When  
10 Respondents unreasonably delay in making decisions regarding pending NPDES permit renewal  
11 applications, these failures to make decisions result in further pollution and this could suggest to  
12 the public and/or Petitioners' members and funders that the these Petitioners are failing to  
13 achieve their organizational missions and goals, which are specifically to reduce pollution of  
14 Oregon's waters.  
15

16 11.

17 Petitioner Bakke has been involved with the protection of fish and Oregon rivers for  
18 approximately 50 years.

19 12.

20 Petitioner Bakke is a lifelong fisherman and a lifelong resident of Oregon. He uses  
21 Oregon waters affected by Respondents' failures to make decisions on pending NPDES permit  
22 renewal applications. He fishes and recreates on many of Oregon's rivers including the  
23 Columbia, Willamette, Deschutes, Klamath, and Snake Rivers. He also fishes on many of those  
24 rivers' tributaries.  
25

13.

1  
2 Petitioner Bakke is adversely affected and aggrieved by Respondents' failures to make  
3 decisions on pending NPDES permit renewal applications because those failures undermine the  
4 effective implementation of current water quality standards and imperil fish. His ability to fish is  
5 diminished by the currently impaired status of many of Oregon's rivers, which is exacerbated by  
6 Respondents' unreasonable delay in making decisions regarding pending NPDES permit renewal  
7 applications.

14.

8  
9 Petitioner Bakke is also adversely affected and aggrieved by Respondent DEQ's  
10 unreasonable delay in making decisions regarding pending NPDES permit renewal applications  
11 because this continuing and repeated failure forecloses his opportunity and ability to review and  
12 submit public comments on those NPDES permits.

15.

13  
14 Individually and collectively, Petitioners' interests are and will continue to be adversely  
15 affected and aggrieved by Respondents' unreasonable delay in making decisions regarding  
16 pending NPDES permit renewal applications unless the requested relief is granted.

16.

17  
18 Respondent OREGON DEPARTMENT OF ENVIRONMENTAL QUALITY (DEQ) is  
19 an agency of the State of Oregon, and has its principal place of business in Multnomah County,  
20 Oregon. Respondent RICHARD WHITMAN is the current Director of Respondent DEQ and has  
21 his office in Multnomah County, Oregon. Respondents should be making decisions, rather than  
22 allowing the continuing unreasonable delay, regarding each of the pending NPDES permit  
23 renewal applications. Attached as Exhibit 1, and incorporated by reference, is a non-exhaustive  
24  
25

1 list of the currently pending NPDES permit renewal applications that Respondents have failed to  
2 make a decision on and/or unreasonably delayed deciding on.

### 3 **LEGAL BACKGROUND**

4 17.

5 Congress passed the CWA to “restore and maintain the chemical, physical, and biological  
6 integrity of the Nation’s waters.” To achieve this goal, the CWA prohibits the “discharge of any  
7 pollutant” from a point source to navigable waters except in compliance with law.

8 18.

9 The main way to achieve compliance with the CWA’s general pollutant discharge  
10 prohibition is by obtaining a NPDES permit. The U.S. Environmental Protection Agency (EPA)  
11 operates the NPDES permitting program, but it may authorize states to run the NPDES program.  
12 Oregon is an authorized state and must comply with the CWA and its implementing regulations,  
13 along with state law, in issuing NPDES permits. Every NPDES permit must establish “effluent  
14 limitations” for some of the pollutants being discharged. States may impose more stringent  
15 requirements than the CWA or EPA approved standards.  
16

17 19.

18 Paralleling the CWA’s statutory requirement, Oregon regulations provide that a NPDES  
19 permit will be effective for a “fixed term not to exceed five years.” Congress also has, in the  
20 past, reaffirmed the importance of five-year review of CWA permits.

21 20.

22 Any person wishing to obtain a renewal of an existing NPDES permit from DEQ must  
23 submit a written application at least 180 days before an NPDES permit is needed. EPA, or an  
24 authorized state agency such as DEQ, may issue a new NPDES permit to an existing pollution  
25

1 discharger who has timely sought renewal of an existing permit. If a new or renewed permit is  
2 issued, it **must** incorporate any new and more stringent standards, any new information on the  
3 quality of the receiving waterbody, and any new TMDLs.

4 21.

5 However, if a completed application for renewal of a permit is timely filed with DEQ, the  
6 permit will not expire until final action has been taken by DEQ on the renewal application.

7 **THE RESOURCE AT ISSUE/FACTUAL BACKGROUND**

8 22.

9 Oregon has roughly 111,619 miles of streams and 1,400 named lakes. Many of Oregon's  
10 rivers and streams receive pollutants discharged by industrial and municipal sources that require  
11 NPDES permits.

12 23.

13 Each Oregon waterbody is assigned designated uses and criteria that are intended to  
14 protect those uses. Designated uses and criteria are then incorporated into water quality standards  
15 developed by Respondent DEQ and approved by EPA pursuant to section 303(c) of the CWA.  
16 Respondent DEQ collects water quality data and compares these data to the water quality  
17 standards in order to identify waters that are considered "impaired" pursuant to section 303(d) of  
18 the CWA. Section 303(d) also requires states to develop TMDLs, which are science-based clean-  
19 up plans to restore impaired waters to improved water quality.  
20

21 24.

22 Respondent DEQ is required to update its list of impaired waters every two years. Its  
23 proposed 2012 list, submitted to EPA in 2014, included 1,910 waterbody segment-parameter  
24 combinations, which EPA both approved and disapproved in December 2016. EPA has proposed  
25

1 to add 1,055 segments. Many administratively continued permits were issued before 2012. *See*  
2 Ex. 1. As a result, those permits were not analyzed based on the updated list of impaired waters.

3 25.

4 Respondent DEQ has updated water quality standards **many** times since 1984—the same  
5 year that the oldest currently administratively continued NPDES permit on Exhibit 1 was issued.

6 26.

7 In 1996, Respondent DEQ submitted revisions to its water quality standards to EPA for  
8 temperature, dissolved oxygen, pH, and bacteria. Many administratively continued permits were  
9 issued before 1996. *See* Ex. 1. As a result, those permits were not analyzed based on updated  
10 standards for pollutants such as temperature, dissolved oxygen, pH, and bacteria.

11 27.

12 In 2003, Respondent DEQ again updated its temperature standards. Many  
13 administratively continued permits were issued before 2003. *See* Ex. 1. As a result, those permits  
14 were not analyzed based on updated standards for temperature.

15 28.

16 In 2004, Respondent DEQ submitted to EPA, and ultimately received approval of, new  
17 and revised standards for toxics. Many administratively continued permits were issued before  
18 2004. *See* Ex. 1. As a result, those permits were not analyzed based on updated standards for  
19 toxic pollutants.

20 29.

21 In 2011, Respondent DEQ updated nearly all of its human health criteria for toxics. Many  
22 administratively continued permits were issued before 2011. *See* Ex. 1. As a result, those permits  
23 were not analyzed based on updated standards for human health related toxic pollutants.  
24  
25

30.

In 2015, Oregon adopted new ammonia criteria and in 2016 adopted new copper criteria. In 2015 and 2017, respectively, EPA approved those criteria. And in 2017, EPA promulgated new cadmium criteria for Oregon. Many administratively continued permits were issued before 2015 and 2017. *See Ex. 1.* As a result, those permits were not analyzed based on the new criteria for ammonia, copper, or cadmium.

31.

Prior to 2011, Oregon adopted and EPA approved numerous TMDLs for many waters and basins, including the Willamette, Umpqua, Rogue, Grande Ronde, and John Day basins. These TMDLs developed pollutant limits for sources of pollutants including temperature, mercury, dissolved oxygen, bacteria, nutrients, pesticides, sediment, ammonia, and pH. Many administratively continued permits were issued prior to the approval of relevant TMDLs. *See Ex. 1.* As a result, those permits were not analyzed based on updated TMDLs.

32.

Additionally, if any recently issued permits are similarly administratively continued for a period far exceeding their original permit term, such as many current administratively continued permits, then these permits will also eventually contain out-of-date pollutant limits.

Respondents' continued unreasonable delay in making decisions regarding pending NPDES permit renewal applications will cause the current permit "backlog" to continue to increase.

### **THE PERMITS AT ISSUE**

33.

Currently pending NPDES permit renewal applications constitute DEQ's current permit backlog. *See Ex. 1.* As of the date this complaint is filed, at least 75% percent of all individual

1 NPDES permits in Oregon have exceeded their original fixed five-year term and are now  
2 administratively continued. *See* Ex. 2, at 1. Normally, EPA expects states to maintain a backlog  
3 of administratively continued permits that compromises 10 percent or less of all NPDES permits.  
4 EPA has recognized that the high permit backlog negatively impacts many aspects of Oregon's  
5 NPDES program. On average, to avoid backlog, 72 Oregon NPDES permits should be renewed  
6 annually. DEQ has not come even close to that number for quite some time.

7 34.

8 A significant number of Respondents' administratively continued permits have  
9 applications for renewal that have been pending for five years or more, **beyond** the first  
10 statutorily mandated five-year permit term. A significant number of the administratively  
11 continued permits' applications for renewal have been pending for ten years or more, in addition  
12 to the first statutorily mandated five-year permit term. Some of the administratively continued  
13 permits have been pending for more than two decades.

14  
15 **CLAIM FOR RELIEF**

16 35.

17 This Court has jurisdiction to consider this Petition for Review of Respondents'  
18 unreasonable delay to make one or more decisions pursuant to ORS 183.490 and ORS 183.484.  
19 This Court has authority pursuant to ORS 183.490 to compel an agency to act where it has  
20 unlawfully refused to act or make a decision, or where it has unreasonably delayed taking action  
21 or making a decision.

22 36.

23 Once a completed NPDES renewal application is submitted to Respondents, they are  
24 required to—and for the sake of the public waters, and to give certainty to the permittees,  
25

1 Respondents should promptly—make a decision on whether to deny a permit, or to prepare an  
2 updated proposed draft new NPDES permit.

3 37.

4 Respondents have unreasonably delayed or failed to make a decision on whether to: (a)  
5 deny a permit, or (b) to prepare and issue a proposed draft updated permit, on one or more of the  
6 pending NPDES permit renewal applications for renewal that comprise the current backlog of  
7 administratively continued permits. *See* Ex. 1.

8 38.

9 Respondents failure to make decisions regarding pending NPDES permit renewal  
10 applications has resulted in multiple unreasonable delays, in some cases delays of up to two  
11 decades, or for at least four full permit cycles. *See* Ex. 1. Respondents' pattern and practice of  
12 allowing an excessive backlog of administratively continued applications to exist also constitutes  
13 an ongoing refusal to act and/or an unreasonably delayed agency action.

14 39.

15 Pursuant to ORS 183.497, ORS 183.486, and/or ORS 182.090 Petitioners request an  
16 award of attorneys' fees and costs incurred in this matter.

17 **REQUEST FOR RELIEF**

18 WHEREFORE, Petitioners request that this Court, exercising its authority under ORS  
19 182.090, ORS 183.484(5) and 183.490:  
20

21 (1) Declare that Respondents have unreasonably delayed making a decision on each  
22 NPDES permit renewal application that has been pending for longer than five years;

23 (2) Issue an order requiring Respondents to make a decision on each NPDES permit  
24 renewal application that has been pending for longer than five years within a reasonable time-  
25

1 frame, to be determined by either the Court or, if they can agree, the parties;

2 (3) Award Petitioners reasonable attorneys' fees and costs; and

3 (4) Award Petitioners such other relief as this Court deems just.

4 DATED: March 8, 2017.

5 Respectfully submitted,

6  
7 /s/ Ryan Shannon
