TEMPERATURE COMPLIANCE GUIDANCE MANUAL WORKSHOP

SAVE THE DATE!

June 1, 2017

9:00 am – noon

Willow Lake Treatment Plant
5915 Windsor Island Road North
Keizer, OR 97303

Video and phone access will be provided for this meeting

As DEQ renews NPDES permits, many utilities will likely face stricter temperature limits than were in their previous permit. The temperature limits will be based on applicable fish use (spawning, rearing/migration, migration corridor, and others), the timing/seasonality of the fish use, and applicable TMDL wasteload allocations. Many utilities will likely need to determine how their permit limits will change and evaluate and develop strategies for complying with stricter permit limits. ACWA has developed a new manual to guide users through the steps necessary to evaluate compliance strategies.

Workshop Topics

Attend this workshop to learn more about how to use the new Temperature Compliance Guidance Manual, section-by-section:

- *Applying temperature criteria to permits (all about TMDLs, HUAs, and RPAs)*
- *Data collection and use – collection, statistics, and mixing zones*
- *Compliance Strategies: a guide to best management practices*
- *Developing a compliance plan: tools and frameworks*

Additional Information
